

AEGIS Executive Security Report

Assessment: AEGIS-2026-0001

Asset: google.com

Status: APPROVED

Overall Risk: LOW

Executive Summary

This assessment identified security-relevant services and internet-facing infrastructure associated with the authorized asset. Findings were correlated from reconnaissance and scanning activities performed through the AEGIS assessment workflow.

Key Findings

- External Email Infrastructure Detected

MX records indicate that the domain receives email.

- SPF Record Detected

Domain publishes an SPF policy.

- Administrative Service Exposed

SSH service is reachable.

Recommendations

- Review SPF, DKIM and DMARC configurations.
- Verify SPF policy is maintained and monitored.
- Restrict SSH access to trusted networks or VPN users.
