

AEGIS Executive Security Report

Target Domain / IP:	example.com
Assessment ID:	1
Reference Number:	AEGIS-2026-0001
Date of Report:	2026-07-03 11:55
Overall Risk Status:	INFO (Score: 0)

Executive Summary

An authorized external security assessment was conducted for target resource **example.com**. The assessment analyzed public DNS records, mail infrastructure parameters, open network services (Nmap), and web privacy tracking compliance (Pixel Auditor). Based on the correlation of findings and threat intelligence models, the target's security posture is rated as **INFO**.

Exposed web elements and lack of enforced validation can increase administrative visibility. Immediate remediation for vulnerabilities (like insecure mail setups or pixel data leakage) is advised to lock down exposure boundaries.

Key Findings Summary

External Email Infrastructure Detected (INFO)

Impact: MX records indicate that the domain receives external email, expanding spoofing vector.

SPF Spoofing Policy Detected (INFO)

Impact: Domain publishes an SPF record detailing allowed sender IPs.

Remediation Roadmap

1. External Email Infrastructure Detected (INFO)

Recommended Action: Ensure SPF, DKIM, and DMARC enforcement parameters are tightly maintained.

2. SPF Spoofing Policy Detected (INFO)

Recommended Action: Periodically verify listed IPs to prevent stale server sub-domain takeover.

Assessment Log Timeline

- **2026-07-03 06:19** - Assessment requested with reference: AEGIS-2026-0001
- **2026-07-03 06:19** - Assessment approved by admin
- **2026-07-03 06:22** - DNS and DMARC reconnaissance completed. DMARC Grade: PROTECTED
- **2026-07-03 06:22** - Correlation engine completed. Created 2 correlated findings.
- **2026-07-03 06:23** - Nmap and Pixel privacy scans completed successfully.
